How to Calculate Kinetic Energy 9 Steps with Pictures

Falling mass is purely kinetic. The potential energy is 0. Since potential and kinetic are opposites, when one is maxed, the other is 0. So, when the object is at its fastest speed, there is no potential energy.

Kinetic and Potential Energy Home UW Madison

Potential energy is energy an object has because of its position relative to some other object. When you stand at the top of a stairwell you have more potential energy than when you are at the bottom, because the earth can pull you down through the force of gravity, doing work in the process. When you are holding two magnets apart they have more potential energy than when they are close together. If you let them go, they will move toward each other, doing work in the process.

Potential Energy

To determine the gravitational potential energy of an object, a zero height position must first be arbitrarily assigned. Typically, the ground is considered to be a position of zero height.
